

FOR IMMEDIATE RELEASE

CLOVER FACILITY RECEIVES R2 CERTIFICATION

CHICAGO (January 10, 2012) – Clover Technologies Group announced today that it has received R2 certification, the highest industry standard for environmental responsibility and safety.

R2 Certification, also known as Responsible Recycling Certification, provides verification of Clover's environmentally responsible, safe, and transparent management of toner cartridges, cell phones, and other consumer electronics. R2 Certification is facility specific and will be awarded to Clover's Erie, Pennsylvania collections processing operation.

Clover was recommended for this certification after successful completion of a rigorous third party audit of over 50 areas of operational and environmental performance.

"The implementation of R2 at our Erie, PA processing center has been a significant step in Clover's continuous improvement of our environmental impact and should serve as an example to our industry," said Brian Regan, Executive Vice President of Clover Environmental Solutions. "It provides assurance to our customers and potential customers that we will responsibly manage their materials all the way to their final disposition."
